

Hadia Naveed

Software Engineer

✉ hadiaaanvd@gmail.com ☎ +49 176 74814420 📍 Germany 🌐 [Portfolio](#) [Linked In](#)

Summary

Software engineer with production experience building AI infrastructure and agentic systems. I ship fast, take ownership end-to-end, and integrate AI workflows as a core part of how I build.

Skills

✧ AI Tools & Workflow

MCP server development, Claude Code, OpenCode, Wispr Flow, Anthropic/OpenAI API, AI-assisted development, GitHub Copilot

📱 Frontend

React, JavaScript, TypeScript, HTML, CSS, SASS, Tailwind, Shadcn, Context API, Redux, Axios, React Hooks, Styled Components

🗄 Backend & Databases

Node.js, GCP Serverless Functions, GCP Firestore, NoSQL, Rest API

📦 Version Control & Task Management:

Git, GitHub, Jira, GitLab, ClickUp, Slack

🔗 Third Party & Testing

Stripe, Chart.js, Highcharts, Receptiviti, Playwright

Experience

Staffbase

Germany

Working Student Engineering

June 2025 - June 2026

- Designed, developed, and deployed an MCP server exposing 17 internal APIs as tools for AI agents, integrated into Staffbase's customer-facing MCP offering, enabling agentic consumption of enterprise applications and internal data sources
- Built an internal automation tool that streamlined content authoring in Zendesk, cutting the content writing process time by 85%.
- Supported the migration from WordPress to Storyblok, including the development of a Playwright script to automate the associated workflow
- Contributed to building internal platform tooling designed for agentic consumption, including an entitlement mapping service connecting sellable features to feature flags
- Owned and maintained the **Developer Portal**, introducing and implementing API versioning, federated search, a unified filter component, and targeted UX enhancements that improved the overall developer experience across the platform.
- Implemented end-to-end tests for a company cloning platform using Playwright, achieving full coverage across core user flows.
- Advanced AI-native development workflows using Claude Code, OpenCode, Wispr Flow, and MCP integrations, continuously evaluating state-of-the-art GenAI tools to enhance engineering productivity

Infaque

Pakistan

Full Stack Developer | React & Firebase

Aug 2021- March 2024

- Led frontend development of the company's flagship B2B SaaS donor management system using React, Firebase, and Node.js, contributing to the startup's growth.
- Independently developed a custom hiring platform called **Egility**, leading to the company's first maintenance contract & long-term customer retention.
- Owned feature delivery in agile sprints that aligned with the company's business goals.
- Integrated third-party APIs to enable real-time collaboration and data insights, improving client satisfaction.
- Enhanced frontend UI for responsiveness and cross-browser support, reducing reported UI bugs by 30%.

Sah IT

Pakistan

Intern Software Engineering

Dec 2020 - July 2021

- Built e-commerce and user-facing features in Laravel, contributing to production deployments.
- Delivered pixel-perfect frontend implementations in CSS and Bootstrap matching design mockups exactly.

Education

Technical University of Chemnitz Web Engineering, Grade: 1.7	Masters Germany • 2024-2026
University of Lahore Software Engineering, Grade: 1.1	Bachelors Pakistan • 2016-2020
